Hitch Rating Weight (lbs)\(^6\) 5,000 5,000
Tongue Weight (lbs)\(^6\) 500 500
Fuel Capacity (gal) 100 100

Addendums
1. GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motorhome. The GVWR is equal to or greater than the sum of the UVW (unloaded vehicle weight) plus the OCCC (occupant cargo-carrying capacity). The GCWR (Gross Combined Weight Rating) is the maximum permissible loaded weight of this motorhome with its towed vehicle. Towing and braking capacities may be different. Refer to Fleetwood and chassis manufacturer’s manuals for complete information.

2. Length measured from front bumper to rear bumper (excludes accessories).
3. Excludes safety equipment and awnings.
4. Motorhomes feature a body width over 96” which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.
5. Tank manufacturer’s listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.
6. Hitch receiver capacities are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependent on the weight of the towed load. Consult with hitch receiver manufacturer for further information.
